"Sarah's Choice"

Pure Flix Entertainment

The new feature film, "Sarah's Choice," features Rebecca St. James in her debut role as Sarah. The story of Sarah is a poignant look at real life and the worldview of abortion. A view that would say that you should think of yourself first – or in Sarah's case to think of your career. The character is a young woman climbing the corporate ladder of success, poised to make a huge leap forward in the company; Sarah is suddenly faced with an unexpected pregnancy. Aside from the workforce pressures the film also touches on family tensions and friendships.

For the most part the film was well done. As an acting debut, Rebecca was in character and believable. However, there were a lot of cliché moments that were not scripted very well. I also thought the Christmas Carol type visions were kind of an odd way to tell the story, but over all you got the point. "Sarah's Choice" falls short of an epic Hallmark type movie, but it still gets the choose-life message across in a positive way.
